FOR IMMEDIATE RELEASE

### **VIPRide.com's "PEGASUS" IS THE ULTIMATE AFFILIATE MANAGEMENT AND QUALITY CONTROL TOOL**

#### **ALLOWS THE GROUND TRAVEL FIRM TO MANAGE UP TO 100,000 GLOBAL AFFILIATES AND 1 MILLION VEHICLES**

**SCOTTSDALE, AZ** – **VIPRide.com** is looked to as the nation's, and the world's, premier ground travel company and for good reasons.

One of those reasons is *Pegasus*, **VIPRide.com**'s proprietary affiliate management software, designed by company founder Sean Sarram. "I wanted to develop system software that could grow to handle an almost limitless number of global affiliates and a fleet that could expand at the same growth rate... software that would establish a new standard for the ground travel industry," says Sarram, a software systems integration engineer prior to starting **VIPRide.com**.

*VIPRide.com's* Pegasus

*Pegasus* is capable of expanding to manage up to 100,000 affiliates around the world and up to 1 million individual vehicles. **VIPRide.com** already has grown to more than 700 affiliates with an estimated 10,000 individual vehicles in the U.S. alone.

Recognized as the ultimate ground travel affiliate management and quality control software program, Pegasus is a web-based, SQL database system, which means it can be used any place and can be accessed by anyone in the system. In addition to keeping **VIPRide.com** corporate offices in touch with nearly 1,000 separate affiliates, the software also manages the company's certification and quality control programs that track customer satisfaction, individual assignments, insurance coverages and other details for **VIPRide.com** and its affiliates and customers everywhere. Pegasus even stores photos of each vehicle in the **VIPRide.com** fleet, inside and out, so customers know the individual vehicle they will use.

In addition to **VIPRide.com's** 24/7 emergency dispatch center, Pegasus provides corporate travel departments real time confirmation and ride receipts and a customized client invoicing and management/user reporting and travel profiles.

***VIPRide.com's*** Pegasus

“The ground travel industry is now going through the customer service and technology revolutions that have been experienced in the airline, hotel and car rental industries,” says

Sarram whose Pegasus is at the forefront of these ground travel industry changes.
